INDEX

Abies— Page
apollonis, effect of iron sulphate on chlorosis. 154
balsamea, effect of iron sulphate on chlorosis 154
bicolor, effect of iron sulphate on chlorosis... 154
pectinata, growth on calcareous soil..... 154
Acid—
citric, production by storage-rot fungi..... 223
oxalic, production by—
Sclerotinia cinerea..... 631
storage-rot fungi..... 223
phosphoric, in urine, effect of cucurbita seeds..... 525–528
sulphuric, in urine, effect of cucurbita seeds..... 525–528
Acid producers in silage..... 769–770
Acidity—
of silage..... 771
of urine, effect of cucurbita seeds..... 524–528
Acids—
organic, produced in respiration of storage-rot fungi..... 222–223
production by *Rhizopus tritici*..... 631
Acremonium sp., isolated from potatoes..... 828
Actinomyces—
bovis, failure to produce odor on beef..... 695
chromogenus, effect of hydrogen-ion concentration on growth..... 203
Aethecerus n. sp., parasite of *Recurvaria milleri*..... 138
Agglutination tests of *Bacillus megatherium*.. 696
Agropyron repens, indeterminate rhizome.... 177
Agrostis alba, determinate stolon..... 177
Albumen, black blood, in ration for pigs... 281–341
Albumin, milk, in ration for pigs..... 281–341
Albuminoid nitrogen in silage..... 771
Alcohol—
in silage..... 787
produced in respiration of storage-rot fungi..... 221–222
Alfalfa. See *Medicago falcata*.
Alkali, effect on permeability of soil..... 265–278
Alternaria—
sp., isolated from potatoes..... 828
tenuis, glucose as a source of carbon..... 189–210
Amino nitrogen in silage..... 771
Ammonia—
in silage..... 787
nitrogen in silage..... 771
Ammonium—
hydrates in urine, effect of cucurbita seeds..... 524–528
nitrate, effect on growth of storage-rot fungi 190
sulphate, effect on plants supplied with iron..... 701–728
Anastatus semiflavidus—
description..... 374–375
distribution..... 373
habits..... 380–383
hosts..... 383–384
life history..... 375–378
parasite of *Hemileuca oliviae*..... 373–384
Anemia, equine, blood counts..... 684–688
Angitia sp., parasite of *Recurvaria milleri*.... 138
Anthelmintic properties of carbon tetrachlorid..... 157–175
Anthony, Stephen, and Harlan, Harry V. (paper): Effect of Time of Irrigation on Kernel Development of Barley..... 29–45
Apanteles n. sp., parasite of *Recurvaria milleri*. 138
Aphids, transmission of leafroll..... 53–59
Aphis—
potato. See *Macrosiphum solanifolii*.
spinach. See *Myzus persicae*.
Apium graveolens, host of *Pseudomonas apii* 185–188
Aplanobacter stewarti, Stewart's disease of corn..... 263–264
Appleman, Charles O. (paper): Reliability of the Nail Test for Predicting the Chemical Composition of Green Sweetcorn..... 817–830
Apricot trees, concentration of cell sap.. 85–86, 94–95
Armsby, Henry Prentiss, and Kriss, Max (paper): Some Fundamentals of Stable Ventilation..... 343–368
Arny, A. C. (paper): Further Experiments in Field Technic in Plot Tests..... 483–500
Ascarids, efficacy of carbon tetrachlorid against..... 157–175
Ascaris equorum, relation to Eosinophiles.. 679–688
Ash—
effect on development of pigs..... 280–341
in barley kernels, effect of time of irrigation 31–45
stored on different rations..... 326–334
Aspen. See *Populus tremuloides*.
Aspergillus—
glaucus, glucose as a source of carbon.... 189–210
niger—
glucose as a source of carbon..... 189–210
sugar used in respiration..... 218
Assimilation of Nitrogen, Phosphorus, and Potassium by Corn when Nutrient Salts are Confined to Different Roots (paper).. 545–573
Austrian pine. See *Pinus austriaca*.
Awns, suppression by fungus..... 699–700
Bacillus—
bronchisepticus, failure to produce odor on beef..... 695
carotovorus, enzym production..... 611–612
casei, ability to produce ammonia..... 787
coli—
communior, failure to produce odor on beef..... 695
communis, failure to produce odor on beef 695
glucose as a source of carbon..... 189–210
enteritidis, failure to produce odor on beef.. 695
gallinarium, failure to produce odor on beef. 695
icteroides, failure to produce odor on beef... 695
lactimorbis, failure to produce odor on beef. 695
lathyri, causal organism of "stripe" disease of tomato..... 123
megatherium—
cause of souring of beef..... 689–698

Page

Bacillus—Continued.
var. *de Bary*, similarity to *B. megatherium* var. *Ravenellii*... 691-698
var. *Ravenellii*, similarity to *B. megatherium* var. *de Bary*... 691-698
mesentericus, failure to produce odor on beef 695
omnivorus, enzym production... 611
phytophthorus, prevention of infection by wound-cork formation... 646
prodigiosus, failure to produce odor on beef.. 695
pullorum, failure to produce odor on beef.. 695
pyocyaneus—
failure to produce odor on beef... 694
glucose as a source of carbon... 189-210
subtilis—
failure to produce odor on beef... 695
glucose as a source of carbon... 189-210
typhi murium, failure to produce odor on beef... 695
vulgatus, odor on beef... 695
Bacillus, grass, of Moeller, failure to produce odor on beef... 695
Bacillus of Priesz and Nocard, failure to produce odor on beef... 694
Bacterial Budrot of Cannas, A (paper)... 143-152
Bacterial Leafspot Disease of Celery (paper) 185-188
Bacterial Spot of Tomato (paper)... 123-156
Bacterial Wilt of Castor Bean (Ricinus communis L.) (paper)... 255-262
Bacteriological and Chemical Studies of Different Kinds of Silage (paper)... 767-789
Bacterium—
cannae, n. sp.—
distribution... 146
organism... 148-152
susceptible hosts... 145
exitiosum, n. sp.—
causal organism... 130-155
hosts... 123-125
relation to bacterial spot of pepper... 125-126
symptoms... 126-129
technical description... 141
temperature relations... 138-139
fumefaciens, inoculations on *Bryophyllum calycinum*... 593-598
vesicatorium, n. sp. See *Bacterium exitiosum*, n. sp.
Balsam. See *Impatiens balsamina*.
Barley. See *Hordeum* spp.
Bean, castor. See *Ricinus communis*.
Beans, varietal susceptibility to rust... 385-404
Beef, souring... 689-698
Beetle, mountain-pine. See *Dendroctonus monticolae*.
Bermuda grass. See *Cynodon dactylon*.
Biological Study of the Red Date-Palm Scale, Phoenicococcus marlatti, A (paper) 659-668
Biology and Economic Importance of Anastatus semiflavidus, a Recently Described Egg Parasite of Hemileuca oliviae (paper) 373-384
Bishopp, F. C., and Laake, E. W. (paper): Dispersion of Flies by Flight... 729-766
Bishopp, F. C. (paper): Solenopotes capillatus, a Sucking Louse of Cattle Not Heretofore Known in the United States... 797-801

Page

Blastomyces, odor on beef... 695
Black blowfly. See *Phormia regina*.
"Black scab" of tomato. See *Bacterium exitiosum*, n. sp.
Bluegrass. See *Poa pratensis*.
Blight, Septoria, treatment of celery seed for control... 369-372
Blowfly, black. See *Phormia regina*.
Borden, Arthur D. (paper): A Biological Study of the Red Date-Palm Scale, Phoenicococcus marlatti... 659-668
Border effect... 489-495
Botrytis—
cinerea—
cause of potato rot... 211-226
enzym production... 612
glucose as a source of carbon... 189-210
sp., isolated from potatoes... 828
Breeding, line, effect on variations in cotton... 235-237
Bromus inermis, rate of culm formation... 803-816
Bryan, Mary K. (paper): A Bacterial Budrot of Cannas... 143-152
Bryophyllum calycinum, effect of crowngall inoculations... 593-598
Budrot of cannas. See *Bacterium cannae*.
Bulgaricus organisms in silage... 770
Bunyea, Hubert (paper): A Souring of Beef Caused by Bacillus megatherium... 689-698
Caffrey, D. J. (paper): Biology and Economic Importance of Anastatus semiflavidus, a Recently Described Egg Parasite of Hemileuca oliviae... 373-384
Calcium—
carbonate in ration for pigs... 280-341
citrate crystals in condensed milk... 791
phosphate—
crystals in condensed milk... 791
in ration for pigs... 280
sulphate, effect on alkali soil... 271
Calcium-sodium ratio of irrigation water... 274-277
Canada field pea silage... 771-775
Cane sugar, in sweet potato, effect of *Rhizopus tritici*... 627-635
"Canker" of tomato. See *Bacterium exitiosum*, n. sp.
Canna indica, host of *Bacterium cannae*... 143-152
Capsicum annuum, host of *Bacterium exitiosum*... 123-156
Carbohydrates—
in sweet potatoes, effect of *Rhizopus tritici*. 627-635
used in respiration of storage-rot fungi... 211-226
Carbon—
dioxid, production by—
farm animals... 351-362
respiration of storage-rot fungi... 211-226
Rhizopus tritici... 627-635
glucose as a source for sweet potato storage-rot fungi... 189-210
tetrachlorid, effect on boiling point of chloroform... 543-544
Carbon Tetrachlorid for the Removal of Parasitic Worms, Especially Hookworms (paper)... 157-175
Carbonate, calcium, in ration for pigs... 280-341

Page

Carrero, J. O., and Gile, P. L. (paper): Assimilation of Nitrogen, Phosphorus, and Potassium by Corn When Nutrient Salts Are Confined to Different Roots 545–573
Casein, milk, in ration for pigs 281–341
Cash, Lillian C., and Rand, Frederick V. (paper): Stewart's Disease of Corn 263–264
Castor bean. See *Ricinus communis*.
Catalese, Hydrogen-Ion Concentration, and Growth in the Potato Wart Disease (paper) 589–592
Cattle, sucking louse 797–801
Celery—
  leafspot disease 185–188
  seed, treatment for control of Septoria blight 369–372
  See *Apium graveolens*.
Cephalothecium sp., isolated from potatoes ... 828
Chaetomium spp., isolated from potatoes 828
Chemical studies of silage 767–789
Chenopodium—
  effect on efficacy of carbon tetrachlorid as an althelminite 167
  efficacy as an anthelmintic 169–170
Chlorid—
  potassium, effect on growth of storage-rot fungi 190
  sodium—
    effect of leaching soils 268–271
    in ration for pigs 280–341
Chloris gayayna, indeterminate stolon 178
Chloroform—
  effect of carbon tetrachlorid on boiling point 542–544
  efficacy as an althelmintic 168–170
Chlorosis of Conifers Corrected by Spraying with Ferrous Sulphate, A (paper) 153–171
Chrysomya macellaria, dispersion by flight. 733–766
Chrysophlyctis endobiotica, cause of potato wart disease 589–592
Citrate—
  calcium, crystals in condensed milk 791
  ferric, in ration for pigs 280–341
  sodium, in ration for pigs 280–341
Citric acid. See Acid, citric.
Citromyces glaber, production of citric acid ... 223
Citrus—
  aurantium, effect of temperature on susceptibility to *Cladosporium citri* 243–253
  grandis, susceptibility to *Cladosporium citri* 244
  limonia, susceptibility to *Cladosporium citri* 244
  nobilis var. *unshiu*, susceptibility to *Cladosporium citri* 244
  sinensis, susceptibility to *Cladosporium citri* 244
Citrus scab, temperature relations 243–253
Cladosporium—
  citri, temperature relations 243–253
  herbarum, difference from *C. citri* 244
  sp., isolated from potatoes 828
Climate, relation to potato leafroll 75–76
Collar-Rot of Tomato (paper) 179–184

Page

Colletotrichum—
  lindemuthianum, effect on host tissue 612
  solanicolum, isolated from potatoes 828–848
Colon-aerogenes organisms in silage 770
Coniophora cerebella, effect of hydrogen-ion concentration on growth 203
Constant-Temperature Bath for Heating Blood Serum, A 541–544
Copidosoma sp., parasite of *Recurvaria milleri* 138
Copper sulphate, effect on mold infestation of wheat 106–119
Cork formation in sweet potato 637–647
Corn—
  assimilation of nutrient salts 545–573
  germ in ration for pigs 281–341
  silage 775–787
  Stewart's disease 263–264
  See *Zea mays* and *Zea mays indentata*.
Correlation and Growth in the Branches of Young Pear Trees (paper) 849–876
Corsican pine. See *Pinus laricio corsicana*.
Corticium vagum—
  isolated from potatoes 828–848
  temperature relations 459–482
Cotton Rootrot in the San Antonio Rotations (paper) 117–125
Cotton—
  host of *Bacterium solanacearum* 262
  variations 227–242
Cows, body temperature 1–28
Crab grass. See *Syntherisma sanguinalis*.
Creatinin in urine, effect of cucurbita seeds. 524–528
Crowngall. See *Bacterium tumefaciens*.
Curcurbita—
  maxima seeds, effects on animal metabolism 523–539
  moschata seeds, effects on animal metabolism 523–539
  pepo seeds, effects on animal metabolism. 523–539
Cucurbita seeds, effects on animal metabolism 523–539
Culm formation in *Bromus inermis* 803–816
Cunningham, C. C. (paper): Study of the Relation of the Length of Kernel to the Yield of Corn (Zea mays indentata) 427–438
Cynodon dactylon, indeterminate stolon 178
Cyphomandra betacea, host of *Septoria lycopersici* 504
Date palm. See *Phoenix dactylifera*.
Date-palm scale. See *Phoenicococcus marlatti*.
Datura stramonium, host of *Bacterium solanacearum* 259
Day, effect of length on seedlings of alfalfa. 599–608
Dendroctonus monticolae, parasitic on mountain pine 127
Determinate rhizome in timothy 177
Determinate stolon in timothy 177
Dioxid, carbon, production by—
  farm animals 351–362
  Rhizopus tritici 627–635
Diplodia tubericola—
  cause of potato rot 211–226
  glucose as a source of carbon 189–210

Magnesium—
in irrigation water..... 275-277
sulphate, effect on growth of storage-rot fungi..... 190
Malacosoma fragilis, eggs host of *Anastatus semiflavidus*..... 384
Manure, effect on cotton rootrot..... 123-124
Mast cells in blood of horses..... 678-688
Masurovsky, Benjamin (paper): Effects of Some Cucurbita Seeds on Animal Metabolism..... 523-539
Medicago—
falcata, effect of length of day on seedlings. 599-608
sativa, effect of length of day on seedlings. 603-608
Mercuric-chlorid solution, reduction in strength..... 575-587
Merulius lachrymans, effect of hydrogen-ion concentration on growth..... 203
Milk—
albumin in ration for pigs..... 281-341
casein in ration for pigs..... 281-341
protein in ration for pigs..... 281-341
Moeller's grass bacillus, failure to produce odor on beef..... 695
Moisture—
effect on *Corticium vagum*..... 463-464
in silage..... 771
Molds, susceptibility of injured seeds..... 99-122
Mononuclears in blood of horses..... 678-688
Morrison, Harold (paper): Red Date-Palm Scale, Phoenicococcus marlatti: A Technical Description..... 669-676
Mosaic, relation to potato leafroll..... 74-75
Mountain-pine beetle. See *Dendroctonus monticolae.*
Mucor—
javanicus, inversion of cane sugar..... 189
racemosus—
cause of potato rot..... 211-226
glucose as a source of carbon..... 189-210
sp., isolated from potatoes..... 828
stolonifer—
effect on plant tissues..... 611
prevention of infection by wound-cork formation..... 646
Musca domestica, dispersion by flight..... 729-766
Muscina stabulans, dispersion by flight.... 729-766
Myzus persicae, transmission of leafroll..... 55-57
Naemosphaera sp., isolated from potatoes... 828-848
Nail test for sweetcorn..... 817-820
Nasturtium. See *Tropaeolum majus.*
Needle-miner, lodgepole. See *Recurvaria milleri.*
Net-necrosis of *Solanum tuberosum*..... 47-80
Nettle, horse. See *Solanum carolinense.*
Nitrate, ammonium, effect on growth of storage-rot fungi..... 190
Nitrogen—
albuminoid, in silage..... 771
amino, in silage..... 771
ammonia, in silage..... 771
assimilation by corn..... 545-573
in barley kernels, effect of time of irrigation. 31-45
in urine, effect of cucurbita seeds..... 524-528
